Topology and its Applications
Volume 142, Numbers 1–3, 28 July 2004

Contents

Contributions

P. Fabel
Characterizations of compactly almost periodic homeomorphisms of metrizable spaces 1

S.A. Shkarin
Isometric embedding of finite ultrametric spaces in Banach spaces 13

Y. Yajima
A base property in paracompact products and its applications 19

J. van Mill and R. Pol
On spaces without non-trivial subcontinua and the dimension of their products 31

J.A. Hillman
PD_4-complexes with fundamental group a PD_2-group 49

J.-P. Doeraene and M. El Haouari
About dual cube theorems 61

V. Baladze
Characterization of precompact shape and homology properties of remainders 73

W.-X. Shi and Y.-Z. Gao
Sorgenfrey line and continuous separating families 89

I. Shishkov
Selections of set-valued mappings with hereditarily collectionwise normal domain 95

F. Lei and Y. Zhang
Haken spheres in genus 2 Heegaard splittings of nonprime 3-manifolds 101

O.T. Dasbach and T. Li
Property P for knots admitting certain Gabai disks 113

W.G. Fleissner, J. Porter and J. Roitman
Coarser connected topologies 131

J. Sichler and V. Trnková
Maps between a space and its square 159

V. Baladze
Characterization of precompact shape and homology properties of remainders 181

S.M. Kelton
Involutions fixing $\mathbb{R}P^j \cup F^n$ 197

Y. Ando
Smooth maps having only singularities with Boardman symbol (1,0) 205

E. Artal Bartolo and H. Tokunaga
Zariski *k*-plets of rational curve arrangements and dihedral covers 227

E. Michael
A theorem of Nepomnyashchii on continuous subset-selections 235

C. Costantini, Ľ. Holá and P. Vitolo
Tightness, character and related properties of hyperspace topologies 245

Author index volume 142 293
